

Connie Marras MD, PhD FRCP(C) trained in neurology at the University of Toronto, followed by a movement disorder fellowship at the Toronto Western Hospital. She completed her PhD in epidemiology at the University of Toronto and then completed an epidemiology fellowship at the Parkinson's Institute in California. She is currently an Assistant Professor of Neurology at the University of Toronto. Her research interests include prognostic factors in Parkinson's disease, environmental and genetic interactions in the cause of Parkinson's disease and clinical assessment tools in Parkinson's disease.
